

Layout Plan:

1. For lots evaluated **AFTER** January 1, 2007, a layout plan by a registered sewage system installer must be submitted to the Portage County Health Department for approval. That plan must show the location, design and specifications of the sewage system that you propose to be used by the dwelling on your lot. An on-site layout and inspection of that layout is also required before an installation permit will be issued.
2. For lots evaluated **BEFORE** January 1, 2007, a permit can be issued requiring pre-January 1, 2007 sewage system specifications until January 1, 2015. No layout plan will be required.
