BUSINESS & INDUSTRY RECYCLING PROGRAM

The Portage County Solid Waste Management — District Recycling Center offers recycling collection services for all businesses and schools in Portage County and neighboring communities. Our Business & Industry program is now in its **10th** year and it is still expanding.

Recyclable materials collected by the District Recycling Center go directly to Portage County's materials recovery facility. Here, materials are sorted, baled and sold to paper mills. We have listed an assortment of fiber materials our program accepts, with the intent of not only diverting these materials from the landfill, but also reducing operating costs to businesses by reducing waste disposal expenses.

We offer a monthly exterior container rental program for your convenience. Please contact our office with any

inquiries regarding this program or to begin pick-up service arrangements.
