d. The two signs may be aggregated into a single sign at the corner provided that the area of any freestanding sign face shall not exceed 75 square feet.

c. Notwithstanding any provision of this section, the area of any freestanding sign shall not exceed 75 square feet.

Under Section 420.06.C (Freestanding Identification Signs in Residential-Village, Commercial and Industrial Districts, Freestanding Billboard) the following is proposed:

Section 420.06 C Proposed (shown in bold):

C. Freestanding Billboard. Freestanding billboard signs billboards are regulated as a business use in Residential-Village (R-V), commercial, and industrial districts and on lands used for agricultural purposes and shall be permitted on land adjacent to state limited-access highways, not to exceed 500 feet from the limited-access fence, and only in compliance with the following requirements:

1. Not more than one billboard sign shall be erected on a lot. A billboard shall not be located less than 500 feet from another billboard, unless it is on the opposite side of the highway.

2. On a vacant lot in a nonresidential district or on land used for agricultural purposes a billboard sign shall not exceed 22,800 square feet in area and 120 feet in height and shall be located a minimum of 20 feet from the street right-of-way and 2550 feet from side and rear property lines. The area of two billboard faces, when attached at one end, shall not exceed 3000 square feet combined.

3. When located on a lot in combination with another business use in a nonresidential district, a billboard sign shall comply with the area, height and setback regulations for accessory freestanding business identification signs set forth in Schedule 420.04.D, Schedule 420.07 and Section 420.06. The billboard sign shall take the place of the freestanding identification sign permitted in Section 420.06A2. A billboard shall not be considered as a business identification sign when located on the same parcel as a commercial business.

4. Billboards shall be single-faced and placed at a viewing angle for the direction of travel pertaining to the side of the highway in which the billboard is located. Two billboard faces may be attached at one end, with a separation at the rear of no more than 15 feet, to accommodate the vision from both directions of traffic.

5. A billboard shall not be located less than 500 feet from an existing residential structure.

6. Billboards may be digital and lit 24 hours a day in compliance with Chapter 440 of the Zoning Resolution. Digital billboards shall have a light sensor that detects ambient light. The brightness of the billboard shall not exceed 0.3 foot-candles above ambient light. Digital billboards shall change its text or screen no more than once every 10 seconds.
7. The structure and billboard shall be maintained and in good repair at all times.

The existing regulations caused every billboard in the township to be non-conforming, so these proposed changes are intended to make some, if not all, conforming, while also putting updated restrictions in place for future billboards. Also, the proposed changes in Section A are intended to reduce the number of non-conforming signs in the township, as many are greater than 75 square feet.

Staff recommends approval of the proposed amendment.

Amendment No. 2

Under Section 310.03.D, Rootstown Township is proposing to allow zoning certificates for solar energy systems without going through the Zoning Board of Appeals, who have not felt it necessary to set conditions on solar panel applications, as long as setback requirements are in place. In the proposed amendment Rootstown Township is proposing to separate wind and solar energy types and allowing solar to be permitted as long as it meets setback requirements while wind energy will still be considered a Conditionally Permitted Use.

Staff recommends approval of the proposed amendment.

Amendment No. 3

Under Section 340.03 Rootstown Township is proposing to allow for storage buildings in the Lake District on unleased property that is shared by the leaseholders. This along with a previously proposed amendment to Section 340.06 is intended to bring existing structures into conforming status.

Staff recommends approval of the proposed amendment.

Amendment No. 4

Rootstown Township is proposing to remove regulations on solar panels that are felt to be better handled by the County electrical permit. Section 480.18 (Liability) and Section 480.20 (Maintenance) were removed in their entirety and Section 480.19 (Location) was revised and moved to Section 480.18. A motion was made by S. **Suffield Township Rezoning from Industrial to R-2 on State Route 43, Loren Harter, applicant** – Report presented by Todd Peetz

The applicant is requesting that four parcels totaling 6.795 acres be changed from Industrial to R-2, Residential.

The existing property has a single-family residential home located on State Route 43 to the East of Wingfoot Lake and is approximately 500 feet north of Wingfoot Lake Road.

There are wetlands, floodplains and hydric soils on the northwest and western portion of the proposed zoning change. Hydric soils may impact foundation suitability of a structure. If any residential homes are constructed, any further impacts to the on-site wetlands should be avoided.

The proposed change would be in keeping with the existing development pattern as there are no industrial uses nearby.

A motion was made by D. Kemble to follow staff recommendation. Motion seconded by J. Cicozzi. Motion carried with 21 Yeas and 1 Abstention (A. Bey).
